Letter of Interest for NFDI4Text+

To whom it may concern:

This letter expresses the strongest support of the German Association for American Studies (GAAS) for the Text+ consortium as a provider and developer of concepts and solutions for infrastructure and services under the umbrella of the German National Data Infrastructure (NFDI) program. The GAAS acknowledges the vital contributions of the Text+ consortium and declares its support as a membership organization with a relevant community of interest. Representatives from our Association will actively participate and engage in the governing body of the consortium and look forward to participating in further activities, such as trainings, public outreach, and scholarly workshops.

Sincerely,

Prof. Dr. Philipp Gassert
President GAAS

Gegründet 1953 in Marburg.
