Letter of Commitment – NFDI4Text+

Dear Prof. Dr. Hinrichs,
Dear Colleagues,

with this letter we would like to express our support for the NFDI4Text+ initiative. We are very happy to join the initiative as participants and envisage to actively collaborate, e.g., on the following topics, bringing in our expertise as a supercomputing centre for scientific applications:

- consulting on setup and usage of research data, computing and network infrastructure (including compute-/storage-cloud and long-term-archival infrastructure) – in particular for scientists in the Munich area, who are the primary customers of our IT, HPC and Big Data services;
- metadata models for NFDI4Text+ and for general usage;
- connection to overarching research data infrastructures such as GeRDI (www.gerdi-project.eu) or EUDAT (www.eudat.eu).

In addition, a LRZ expert will join the *Operations Coordination Committee* of NFDI4Text+.

The contributions by LRZ and the involvement of LRZ services and infrastructure in the NFDI activities will be collaboratively discussed in detail. Once the proposal is positively evaluated, final decisions on LRZ contributions (and their funding) will be made in accordance with our statutes and service catalogue.

Yours Sincerely

Prof. Dr. Dieter Kranzlmüller
